

Instructions

While working with ODOT crash data, please let the ODOT Safety Team know if there are any inaccuracies, especially related to crash location. These errors can be updated in the ODOT crash data system.

The preferred method for providing ODOT with the updated crash data information is to send a **CAM Tool** and highlight any changed fields. **Table 1** summarizes the fields that can be modified in the crash data.

The **'Document Number'** is a field that is always required. The **'NLFID'** and **'Logpoint'** OR the **'Latitude'** and **'Longitude'** must be provided.

Table 1. CAM Tool Fields to Update

CAM Tool Crash Fields	Definition	Examples
Crash Type	ODOT's calculated crash type similar to manner of collision but has been expanded for engineering purposes.	See Crash Types below in Table 2
County Cd	The county the crash occurred.	FRA, CUY
ODOT Crash Location	This type of location best describes where the first event of the crash occurred.	See ODOT Crash Locations below in Table 3
NLFID	ODOT's roadway network segments unique identifiers upon which the crash occurred.	SFRAUS00033**C CCHPCR00079**C CALLCR00191A*C
County True Log	The county-based straight-line mileage of the route, at which the crash occurred based on three decimals.	0 to 66.97
On Road	The road name upon which the crash occurred.	BROAD STREET, IR490, US422
At Road	The road name at which the crash occurred.	W 6TH AVENUE, SR87
ODOT Latitude	The angular distance, measured in degrees, north or south from the equator at which the crash occurred.	38.403 to 41.962
ODOT Longitude	The angular distance, measured in degrees, east or west of the prime meridian at which the crash occurred.	-84.821 to -80.943
ODOT FIPS Code	FIPS codes are numbers that uniquely identify geographic areas. This code can be identified through TIMS by displaying boundary layers (ex. Cities and Villages) and clicking the 'Identify' icon to display details.	35476 (Hilliard's FIPS code)

After updating the crash data, go to this link to submit the file to the ODOT Safety Team:

<https://odot.formstack.com/forms/crashdatacleanup>

Table 2. Crash Types

Code	Value
0	Unknown
1	Head On
2	Rear End
3	Backing
4	Sideswipe - Meeting
5	Sideswipe - Passing
6	Angle
7	Parked Vehicle
8	Pedestrian
9	Animal
10	Train
11	Pedalcycles
12	Other Non-Vehicle
13	Fixed Object
14	Other Object
15	Falling From Or In Vehicle
16	Overturning
17	Other Non-Collision
18	Left Turn
19	Right Turn

Table 3. ODOT Crash Locations

Code	Value
0	Data Not Valid or Not Provided
1	Not An Intersection
2	Four-Way Intersection
3	T-Intersection
4	Y-Intersection
5	Traffic Circle/Roundabout
6	5 Or More Point Intersection
7	On Ramp
8	Off Ramp
9	Crossover
10	Driveway/Alley Access
11	Railroad Grade Crossing
12	Shared-Use Paths Or Trails
99	Unknown
